NEW PRODUCTS

January 2, 2006

Enclosed please find our price list dated January 2, 2006, which can be inserted in your red Trumbull catalog, under tab "A", Price List. We regret that cost increases have made price increases necessary on some of our products.

Also, we are attaching literature on our Knucklesaver® pressure relieving flaring tool. This tool reduces the risk of injury in water systems that flare copper and also doubles as a re-rounding tool.

Our OD tapes are now furnished with an OD chart on the reverse side. Your company name and logo can be imprinted without charge with an order of 250 tapes. (See page C-9.)

A pentagon hand key will be available in early 2006. It is cast steel for extra strength and durability. The handle has a hammer and pick.

Counter mats illustrating our tools are now available free of charge. Placing a mat on your counter is likely to increase your tool sales.

Our socket wrench kits have been very popular this past year. If you would like a promotional flyer customized with your company's name, address and phone number, contact your sales rep.

Our line of ductile iron chainwheels has been expanded to include type 316 stainless. The stainless chainwheels are the "pocket" style using welded link (proof coil) chain. (See page G-21.)

We thank you for your business.
